

Electrocardiogram Clearance for Athletic Participation

An Electrocardiogram (ECG) can help identify young athletes who are at risk for sudden cardiac death, a condition where death results from an abrupt loss of heart function. An ECG screening may assist in diagnosing several different heart conditions that may contribute to sudden heart death. Trinity Catholic High School is requiring each student athlete wishing to participate in high school athletics to have 1 electrocardiogram (ECG) screening prior to participating in his or her first athletic sport in high school. The initial ECG may be completed by any licensed physician, including a primary care physician, pediatrician, licensed physician assistant, or certified advanced registered nurse practitioner. If the initial ECG comes back ABNORMAL, the student may only participate after being cleared by a cardiologist or a pediatric cardiologist and execution of an assumption of the risk and hold harmless agreement.

If the ECG is completed by Who We Play For, Orlando Health, Advent Health or Neumors
Stop here and submit this form with the top portion completed along with the email received from the organization.
If the ECG is completed by a licensed physician, PA, ARNP, Urgent Care, or Walk-in-Clinic
An appropriate health care provider trained in the latest ECG interpretation guidelines must complete the below information. It is recommended to interpret ECG readings based on the International Criteria (https://uwsportscardiology.org/). After completing and interpreting the ECG, select the appropriate box below.
I hereby certify that an ECG was performed by myself or an individual under my direct supervision with the following conclusion:
[ ] A NORMAL Electrocardiogram was found and student is at Low Risk/Cleared for Participation
[ ] An ABNORMAL Electrocardiogram was found and the student is Not Cleared for Participation and is being referred to a cardiologist for further review. Only a cardiologist can clear a student with an ABNORMAL ECG interpretation

Participation in high school sports is not without risk. The student-athlete and parent/guardian acknowledge truthful answers to the above questions allows for a trained clinician to assess the individual student-athlete against risk factors associated with sports-related injuries and death. Florida Statute 1006.20 requires a student candidate for an interscholastic athletic team to successfully complete a preparticipation physical evaluation as the first step of injury prevention. This preparticipation physical evaluation shall be completed each year before participating in interscholastic athletic competition or engaging in any practice, tryout, workout, conditioning, or other physical activity, including activities that occur outside of the school year.

We hereby state, to the best of our knowledge, that our answers to the above questions are complete and correct. In addition to the routine physical evaluation required by Florida Statute 1006.20, and FHSAA Bylaw 9.7, we understand and acknowledge that we are hereby advised that the student should undergo a cardiovascular assessment, which may include such diagnostic tests as electrocardiogram (ECG), echocardiogram (ECHO), and/or cardio stress test. The FHSAA Sports Medicine Advisory Committee strongly recommends a medical evaluation with your healthcare provider for risk factors of sudden cardiac arrest which may include the special tests listed above.
